A Possible London Perforating Machine Maker - "Butterfly" Alphabet.

The so-called "Butterfly" alphabet was given this name in a Perfin Society Bulletin article published in June 1993 (Bulletin N° . 264). More details emerged in the August 1993 Bulletin, and a special feature was made of the 'series' in the Perfin Society Stampshow 2000 exhibit. The list was last updated in April 2004 (Bulletin N° . 329), so over a decade later, now is a good time to publish an up-to-date list!

The original die showing the characteristic "W" that sparked of the study was "CW/&C" (C8380.06v). To some it's a delicate Swallowtail butterfly, to others it's a 'keep fit' fanatic. As I've never enjoyed breaking out in a sweat, I know which name I prefer!

Papilio machaon

Although many of the dies are scarce, where examples are plentiful (e.g. "N&Z") considerable variation may be seen in the positioning of the pins forming the pattern. This lends support to the idea that the initialling was done using a die with removable pins set in a regular grid pattern. The postage stamps were probably perforated 'on request' and may even have been served 'over the counter'. *John Mathews* calls this type of die a 'Service Die', which (for me) seems to conjure up exactly the right sort of image.

The examples above of "N&Z" show the "&" pins 'all over the place'!

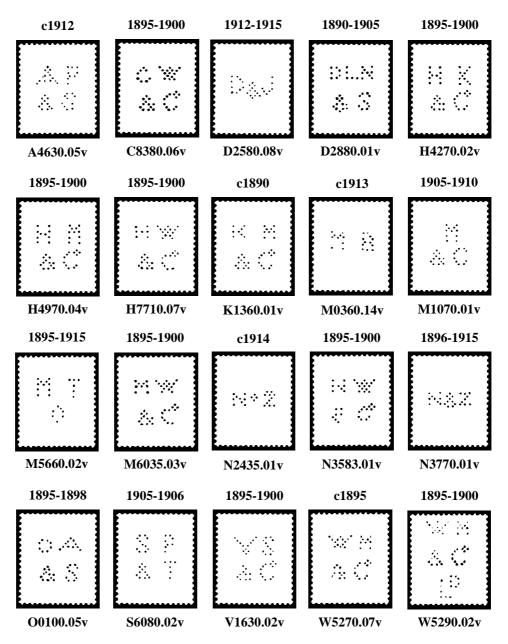

For dies that do not contain a "W", there is the uncomfortable looking "C" and "C" to look out for, as well as a characteristic "S". All dies now have the suffix 'v' added to their catalogue number to warn collectors of 'variations', even if only one example is currently known.

Based on dated examples and the stamp issues involved, these 'Service' dies were in use for around twenty-five years, say 1890-1915. The earliest date recorded so far is 10th May 1890 on "DLN/&S", whereas the latest is 1st April 1914 on the rare, and possibly unique, "N°2". This "N°.2" smacks of a Shell Filling Factory, but we have no post-town clues as to where it was actually used. Legible postmarks are predominantly from London, although examples from Oxford, Sheffield, and Dublin have also been reported.

Just six of the dies from this scarce but interesting group of Perfins have identified users.

- · "DLN/&S" D L Nisbet & Son, London EC. (Suspected)
- · "MT/O" Morrels (Trustees), Lion Brewery, Oxford. (Suspected)
- · "N&Z" Negretti & Zambra Ltd, London W. (Suspected)
- · "OA/&S" Olney, Amsden & Sons Ltd, London EC. (Confirmed)
- "SP/&T" Steel, Peech & Tozer Ltd, Rotherham. (Suspected)
- · "VS/&C" Vyse, Sons & Co, London EC. (Suspected)

Silhouettes of the dies involved.

John Mathews has made the suggestion that "N^o2" may well be an extreme example of "N&Z", and he may well be right. It would be good to see another example turn up!

This is a brief listing of the dies involved, five of which (as listed on the previous page) have identified users.

	Cat No.	Letters	Die in use	Earliest Date	Latest Date	Postmark
1	A4630.05v	AP/&S	c1912			
2	C8380.06v	CW/&C°	1895-1900	13 Jan 1897	7 July 1899	London.
3	D2580.08v	D&J	1912-1915			
4	D2880.01v	DLN/&S	1890-1905	10 May 1890	8 Nov 1902	London.
5	H4270.02v	HK/&C°	1895-1900	2 Feb 1898	15 June 1898	London EC.
6	H4970.04v	HM/&C°	1895-1900	14 May 1897	1900	London EC.
7	H7710.07v	HW/&C°	1895-1900	29 Aug 1896	29 Aug 1898	'NPB', London EC.
8	K1360.01v	KM/&C°	c1890			
9	M0360.14v	MB		29 July 1913	•••	
10	M1070.01v	M/&C	1905-1910			London.
11	M5660.02v	MT/O	1895-1915	5 Apr 1899	28 Oct 1907	Oxford.
12	M6035.03v	MW/&C°	1895-1900	6 Nov 1899		London EC.
13	N2435.01v	N°2	c1914		1 Apr 1914	London.
14	N3583.01v	NW/&C°	1895-1900	27 July 1896		
15	N3770.01v	N&Z	1896-1915	16 Oct 1896	Dec 1909	London EC.
16	O0100.05v	OA/&S	1895-1898	5 Feb 1897	26 Nov 1898	London, and Dublin.
17	S6080.02v	SP/&T	1905-1906	28 Dec 1905		Sheffield.
18	V1630.02v	VS/&C°	1895-1900	11 Nov 1897	10 Aug 1899	London.
19	W5270.07v	WM/&C°	c1895			London EC.
20	W5290.02v	WM/&C°/Ld	1895-1900	21 Mar 1899		London.

Acknowledgements.

My thanks go to all the Perfin collectors who, over the years, have kindly provided stamp details for some of the more elusive dies listed in this study:

Dave Hill, John Mathews, Peter Maybury, Michael Millar, John Nelson, Steve Netten, Mike Oxley, Barry Pawson, Reg Powell, Terry Pusterla, Alan Sandy, Harry Skinner, Arthur Smith, Rosemary Smith, Richard Smolnicki, Gerry Soutar, Stephen Steere, and Terry Wood.

And finally, if you can add anything new to the study, particularly any dies you think I might have missed or possibly not know about, *I'd be pleased to hear from you!*

Roy Gault - 1st January 2019.
